Company Profile.

GA.B.S. SRL is on market since 1980 and is specialized in Mechanical Design with the support of numerical control machines, finalized to the production of **Special Equipment**.

With **Special Equipment** we intend shearing and bending machines, welding masks and small assembled groups and molds. Every component is built, assembled and *carefully finished*. In addition to the production of **Special Equipment**, GA.B.S. srl is specialized in building Slydway (gluing of Turcite® or biplast look at the photo), Slide, Boxes and cast iron fusions. The variety of machines and our flexibility allow us to manage and accomplish much of the work in short terms of time. Every process is performed using both manual machines and numerical control systems, granting high precision and better quality on the final product. Using CAD - CAM "WorkNC" on a digital network, GA.B.S. SRL is able to manage some of the work carried out on every machine.
